Online Employment across the Netherlands Weakens, as Sales and HR Job Availability Declines

March 2009 Index Highlights:

- The Monster Employment Index Netherlands dropped eight points in March, with the Index now showing weaker demand for the eleventh consecutive month.
- Year-on-year, the Index declined 97 points, the sharpest annual decline for the Index in the Netherlands
- The HR sector exhibited a decline on both a monthly and annual basis, whilst demand also fell sharply in the banking; and administrative sectors
- Conversely, the healthcare; agriculture, public, hospitality and R&D sectors saw increased job availability in March
- Plant and machine operators and assemblers registered the most significant fall in demand among occupations groups
- Among regions, Noord-Brabant registered the sharpest fall in opportunities on the month, whilst Zeeland exhibited the sharpest increase in demand

Summary Overview

The Monster Employment Index Netherlands declined eight points in March, with demand falling in the HR, administrative, banking, and sales sectors. Opportunities are increasing in healthcare and hospitality, driven by public sector and seasonal cycles.

The Monster Employment Index Europe is a monthly analysis of millions of online job opportunities culled from a large, representative selection of corporate career sites and job boards across Netherlands, including Monsterboard.nl.

Mar 09	Feb 09	Jan 09	Dec 08	Nov 08	Oct 08	Sep 08	Aug 08	Jul 08	Jun 08	May 08	Apr 08	Mar 08
113	121	123	147	156	164	170	173	194	203	206	210	210

“The tightening in the online job market in certain sectors indicates that businesses are preparing to ensure that they remain stable in this economy by maintaining their current staffs,” commented Diana Krieger, general manager Benelux, Monster Worldwide Europe. “However, unemployment currently remains below year-earlier levels and we are still seeing a significant number of online job offerings in sectors such as hospitality and tourism; and healthcare and social work.”

Recruitment activity for HR and sales continue to decline

Opportunities in the HR sector fell for the sixth consecutive month, dipping 18 points. Year-on-year, the sector declined 180 points, with the sector now representing the sharpest annual decline over the past quarter. Among regions, Utrecht saw the sharpest decline in online offerings for HR workers.

The demand for Clerks declined on the month for Admin/Org employers. Demand for professionals in the sector was down to a lesser degree. Among regions, cooling recruitment trends for the sector were observed primarily in Noord Holland and Utrecht.

The sales sector saw online offerings decline nine Index points in March. The sector has continued to decline steadily since the beginning of 2008. In March, online opportunities fell the most for technicians and service workers, whilst opportunities increased slightly for clerical occupations. All regions with the exception of Groningen saw fewer online offerings.

Production, manufacturing, maintenance and repair opportunities declined eight points, coinciding with a recent Statistics Netherlands report of a decline in manufacturing turnover by 25 percent annually. Online offerings fell for plant and machine operators and assemblers, whilst opportunities remained stable for craft and related workers.

Plant and machine operators and assemblers demand falls

Plant and machine operators and assemblers saw online recruitment activity drop 19 points, settling at 73 points. The decline reflects significantly weaker demand in the production, manufacturing, maintenance and repair sector. On an annual basis, online offerings have fallen 101 points, or 58 percent.

Opportunities for elementary occupations fell 14 points. The decline is a result of fewer offerings for temporary workers in the group.

Skilled agricultural and fishery workers saw demand increase for the second consecutive month as it jumped 26 points. The group was the only one to report positive year-on-year growth, climbing five points compared to March 2008.

Demand continues to weaken in Noord-Brabant, while increases are seen in Zeeland

Noord-Brabant saw opportunities decline 12 points in March, the sharpest monthly decline amongst all regions. Fewer opportunities were reported in consulting, engineering, production and construction. Annually, offerings across the region were down 50 percent.

Online offerings in Utrecht fell 11 points as opportunities declined in engineering; administrative; banking; and sales. Clerks; and plant and machine operators and assemblers represented the majority of the decline in the region.

Zeeland's online job availability increased for the second consecutive month, climbing nine points. The increase in March was prompted by stronger demand in the banking, finance and insurance; and IT sectors. On an annual basis, the region saw the smallest rate of decrease among the regions, losing just five points since March 2008.

Top Growth Sectors

Industries showing the highest increase in demand on a monthly basis:

Industry	Mar 09	Feb 09	Mar 08

Monster Employment Index Netherlands for April will be released on May 12, 2009.

About The Monster Employment Index Europe

The Monster Employment Index Europe provides monthly insight into online recruitment trends across the European Union. Launched in June 2005 with data from December 2004, the Index is based on a review of millions of employer job opportunities culled from a large, representative selection of corporate career sites and job boards, including Monster. The Monster Employment Index's underlying data is validated for accuracy by Research America, Inc. – an independent, third-party auditing firm – to ensure that measured online job recruitment activity is within a margin of error of +/- 1.05%.

The Index monitors online job opportunities across all European Union member countries.

The monthly reports for Belgium, France, Germany, Italy, the Netherlands, Sweden, the United Kingdom and Europe are available at:

http://corporate.monster.com/Press_Room/MEI_EU.asp.
